Babcock-Hitachi K.K.

Order Received for First DeNOx Plant from Polish Power Company

Babcock-Hitachi K.K. (herein after states as BHK) was awarded an order to supply DeNOx plants from Vattenfall Heat Poland S.A., a subsidiary of Vattenfall AB in Sweden, under the Hitachi Ltd., - Energomontaz Polnoc S.A. consortium. This is the first stand-alone contract to supply a DeNOx Plant to Polish Power Company.
The awarded amount of the consortium is approximately 4 billion yen. The operation for the first unit is scheduled to start in 2012.

BHK has been manufacturing DeNOx and DeSOx plant since the 1960s. BHK's DeNOx plant has gained high reputation for the performance of the proprietary plate-type catalysts. Its DeSOx Plant, meanwhile, is installed in thermal power plants throughout the world, including the plant installed for units No. 4 to No. 10 of the Kozienice power plant in Poland.

The Siekierki Combined Heat and Power Plant, to which BHK will supply DeNOx plants, is located in the southwestern part of Warsaw, Poland. The coal-fired combined heat and power plant generates a total of 622MWe of electricity and supplies 2,014MWt of heat. BHK will supply DeNOx plants for units No. 10, 11, 14 and 15 of this power plant (441MWe of electricity and 768MWt of heat total of the 4 units). BHK is responsible for engineering for DeNOx plant, manufacturing and supply of the major equipment and commissioning.
BHK believes that this first-ever order from a Polish Power Company for DeNOx plant is due to its, outstanding performance in DeNOx catalysts and reputation of DeSOx plants in Poland.

European countries have decided to tighten regulations governing emissions of NOx and SOx from thermal power plants starting January 2016. Consequently, power companies in many European countries are now taking steps to add DeNOx and DeSOx plant to their power plants. BHK will continue to promote our DeNOx and DeSOx plant business in Europe.
